

Pocket Miracle by Alex Zhan and TCC Magic

A simple yet powerful tool for prediction and mind reading.

Effect 1

You place a black envelope on the table as your prediction. A deck of cards is introduced, and the spectator can shuffle it thoroughly. They begin dealing the cards onto your hand and stop at any random moment. The stopped-at card is turned over... and it's an exact match to the prediction sealed inside the envelope!

But the real kicker? That single card is the only one with a face, and the rest of the deck is completely blank!

Effect 2

The participant thinks of an object and draws it on a card. The card is slipped face down into the envelope and set aside. Without any suspicious moves, you are able to reveal exactly what they were thinking of.

Pocket Miracle requires no complex sleight of hand or advanced skill. It blends the simplest handling with the strongest impact.

Crafted from premium black cardstock, the envelope is both durable and elegant. Thanks to the hidden secrets within the envelope, you can smoothly load a prediction at any moment or instantly peek at the spectator's drawing. The demo video shows only the basics. You can expand the possibilities to create countless routines, making this a versatile utility tool for any magician.

Features:

- Easy handling, no advanced skill required
- Dual functions: prediction load or instant peek
- Lightweight and portable, ready to perform anytime
- Super direct and reliable peek

What's Included:

- 3 Ã— Gimmicked envelopes
- 2 Ã— Secret tools
- Accessories
