

Sitta Fanning Deck

A rare poker deck produced by the historic company Italcards, active in Bologna during the 20th century—an ideal companion for those who love creating stunning back design changes while fanning the cards!

The back design is cleverly engineered to offer **four distinct variations**, depending on how the cards are fanned:

- Fanning the deck from left to right reveals the first design.
- Closing and reopening the deck from the opposite short side changes the back.
- Repeating the motion from right to left reveals two additional designs.

The deck also includes a blank card, perfect for simulating a completely white deck on the face side—adding a layer of mystery and theatrical impact.

A true must-have for magicians, illusionists, and cardistry enthusiasts seeking wonder and versatility!
