

EDC Tag by Shadow Lin and TCC Magic

EDC Tag

is an ultra-portable, mini mind-reading and prediction system that lets you perform miracles anytime, anywhere!

With it, you can

Read minds: secretly peek at information written on a folded billet.

Perform a Synchronicity Test: where both you and your spectator freely make identical choices.

Create a mini reincarnation effect: a powerful prediction in the palm of your hand.

Sleek Design, Everyday Carry

Crafted from microfiber leather, the EDC Tag features a sleek, minimalist aesthetic with hand-stitched precision. It doubles as a keychain or a luggage tag, effortlessly fitting into your pocket and your daily life, always ready for the next performance.

To make it your true everyday carry, we've included a mini marker pen that attaches securely to the keyring alongside your EDC Tag.

Dual Magnetic Structure

The concealed mechanism leaves no trace of method, while the smooth magnetic action ensures natural handling and flawless performance.

We've also included 50 matching pre-folded square billets with crease lines, perfectly aligned to work with the EDC Tag's magnetic system. You can start practicing or performing straight out of the box, performing clean predictions and direct mind reading with ease.
