

Coin Thru Coin - 2 Euro

The magician show a small plastic container with a coin firmly locked into a support inside. The container is only slightly larger than the coin, which remains visible through a slot. Then, the magician takes a second coin, slides it into the slot... and it magically penetrates the first one!

The audience clearly sees the penetration happen right before their eyes. But when the container is opened, the original coin is still perfectly in place, locked in the support. No visible trick, no logical explanation!

An astonishing effect: matter passing through matter. A captivating illusion that amazes every time.

- Compact and pocket-sized, you'll love having it with you at all times, ready to impress in any moment.
- Equipped with an integrated loop, it can be easily attached to your keychain—or wherever you prefer—for instant access.
- Works with 2 Euro coins (not included). You can also use other coins, as long as they are similar in size to the 2 Euro coin.
