

Flexible Blue Gradient Playing Cards by TCC - Cardistry

The design continues the minimalistic style of the previous edition, with mint green as the main color palette, resembling the clarity of lakes and seas. Ribbon elements have been incorporated into the card faces, creating a continuous and flowing effect.

The color of the card backs transitions from light to dark, providing an aesthetically pleasing experience throughout your practice sessions. Starting from the fresh and bright mint green, to the vivid sky blue, and the pure cornflower blue... concluding with the profound midnight blue. The analogous hues of blue and green smoothly distribute across the card backs.

The paper's resilience and bounce remain outstanding, allowing you to feel the smooth and comfortable touch in every cardistry. Therefore, the "Flexible" deck is suitable for you to experiment with spontaneous and original actions.
