

Light Coaster (Full Set) by Bri, Jeimin Lee, Arbudi

Introducing the **Light Coaster**, a cup that captures light!

The Light Coaster is a utility device created by magician Bri while working as a bartender in 2023. It has been performed for countless audiences in bars, receiving tremendous reactions.

Originally available only to professional magicians in Korea through limited purchase, Light Coaster has now been upgraded and released worldwide in collaboration with Starheart!

What's changed?

Everything has changed, from the coaster's material to its entire system!

It's crafted from premium solid wood and features wireless charging for a seamless, unnoticeable exterior. Most importantly, it's not just about turning lights on and off-you can freely customize everything: light color, brightness, fade-in & fade-out effects, and more, exactly as you desire.

The Light Coaster is a utility device that creates beautiful moments in any setting-close-up, parlor, or stage. Control the light at will to produce unexpected visual effects! It also blends perfectly with other existing light products and can be used alongside various magic tricks like card or mentalism routines to create even more entertaining performances.

Moreover, you can operate four coasters simultaneously with a single remote control. This enables even richer performances! The truly great thing is that each coaster can be perfectly customized exactly as you desire.

Thanks to this, each coaster plays a different 'score,' allowing you to present a stunning visual performance where the light seems to move and live on its own.

Light Coaster Custom System

- Select any desired color
- Adjust timing and duration as desired
- Adjust brightness levels
- Real-time offset control via remote

- Store up to 3 scores per coaster
- Set gradient, step, and blinking effects
