Introducing **Cosmos: Predict Anything (iOS)**

Cosmos - the ultimate prediction tool for magicians and mentalists. Disguised as a sleek bi-fold wallet, it houses the smallest and thinnest printer in the magic market. With no palming, no sleight of hand and no complex setup, Cosmos allows you to print anything anywhere quietly and flawlessly. Be it numbers, words, images or even lottery ticket, cosmos prints it all for you.

Why Cosmos?

Designed specifically for magicians and mentalists who demand reliability and practicality in every performance. It's a complete prediction system that comes with a dedicated app allowing you to print numbers, words, images and even lottery ticket using different inbuilt templates and fonts, or even create your own custom templates and fonts. Works both Offline and Online giving you total control in any environment. And with full API integration, Cosmos connects seamlessly with leading magic apps like Inject, Wiki test, and many more.

Key Features:

1. **Print Anything** - Text, numbers, images and even a full lottery ticket. If you can imagine it, Cosmos can print it!
Perform confabulation effect, reveal any time of the day with a hand-drawn watch, or even predict winning lottery numbers for California and New York Lotto right from the wallet, silently and instantly.

2. **Dedicated App** - Take full control of your performance with the Cosmos App. From input methods like Notes, Calculator or API, to customizing font size, style, and creating your own custom templates, every detail is at your fingertips.

3. **Custom Templates** - Choose from multiple built-in template options or design your own templates to suit your unique routines and performance style.

Ready-made templates for predicting lotto numbers, digital and analogue clock reveals, magic square and more.

4. **API Support** - Seamlessly connect Cosmos with top magic apps like Inject, Wiki test, and more.

5. **Cosmos** is built to last through your entire show with over 10 hours of standby time.

6. **Image Editor** - Edit images directly within the app to craft the perfect reveal.

7. **Handwriting Fonts** - Access a variety of handwriting fonts to make printed text look like handwriting, adding a personal touch to your predictions.

What's in the box?
