

Mystery Box by larvel Magic

Mental cubes and dice are iconic tools used by mentalists worldwide, enabling them to accurately discern spectators' choices even when the mentalist looks away, is blindfolded, or isn't present in the room.

For some time now, it has felt like mental cubes and dice have reached their limits in terms of innovation, a realization that spurred us to spearhead new projects towards their advancements.

The result of the countless hours we dedicated to this project is the MYSTERY BOX-an innovative and entirely new way to integrate the mental cube into your routines once again.

The Mystery Box will pioneer as the world's first mental cube specifically designed to be gifted to spectators as a memorable souvenir after a performance. The device is completely customizable, allowing you to tailor your routines around the variables you or your spectators choose.

What makes the device special and completely different from any other mental cube on the market is the integration of the smallest and fully functional time control watch ever made- The IARVEL watch Nano. This integration of the time variable gives you greater creative flexibility to design fun-filled and astounding routines, enhancing your interactions with your spectators.

WHAT CAN THE MYSTERY BOX DO?

You collaborate with a spectator to create six tiles featuring items like fruits, global airports or name of places they would love to visit, which you attach to the six faces of the mental cube. After turning away, you ask them to rotate the cube to their favorite item and specify a season and time of day they wish to enjoy it.

Once they reset the cube, you turn back and astonishingly reveal their chosen item. To amplify the surprise, you invite them to open the Mystery Box, where the watch inside displays the exact time, they mentioned. Finally, you give them the mental cube as a gift, without any switches.

At this point, you have done more than magic, you have given them a piece of a magical moment they will never forget about.

WHAT ARE THE COMPONENTS OF THE MYSTERY BOX?

It is basically composed of a cube, serving as the mental cube, and a timepiece.

The cube itself is completely ungimmicked, it is the inside of the cube that lies the most important component that makes it all possible- The IARVEL watch Nano.

ABOUT THE IARVEL WATCH NANO

The IARVEL Watch Nano is the direct successor to the original IARVEL Watch, featuring a more compact design, faster performance, and cutting-edge technologies such as gravity sensing, IoT integration, and spatial control. These advanced features enable magicians to effortlessly control the device while accurately determining which of the cube's six faces the spectator has selected.

The IARVEL Watch Nano is designed for versatility, allowing you to wear it around your neck or disguise it as a subtle bracelet until it's time for action. Its compact size and comfortable grip make it an ideal Everyday Carry (EDC) accessory, providing a discreet way to fidget and alleviate stress during your daily routine.

After Rashaun Chan told us about his plan to create such a device, almost all our time and efforts went into this very variation of the IARVEL watch. It took us close to a year and half to make and perfect this very version, so trust me when I say it is flawless and perfect even for everyday use as a regular timepiece.

It is small enough to fit into your pocket but powerful enough to impress even the most skeptical and hard-to-impress spectators you will come across.

You can also connect the device to the IARVEL app and link it to as many IARVEL devices as you have, like the regular IARVEL wrist watch, the Frozen In Time or even your IARVEL Pocket Watch to create an even more powerful performance. The IARVEL pad can also communicate with and control the time on the IARVEL watch nano.

WHAT YOU WILL RECEIVE:

- 1 x THE IARVEL WATCH NANO

- 1 x BLANK CUBES
- 1 x STICKERS
- 1 x CORD
