

Magnetic Forcing Die by Alan Wong & Magic Express (Single die set)

Introducing Magnetic Forcing Die by Alan Wong & Magic Express

We have created the perfect forcing die that can be EXAMINED and TESTED to be normal before you force the outcome on the die.

You can give the die to spectators to examine and roll as many times on the table by as many people as you want and shown to be normal with random numbers.

Then you borrow a clear glass and place it over a cork coaster.

Ask the spectator to roll the die into the glass and watch it roll naturally until it stops - on your predicted outcome!

Die is magnetic, custom molded and engineered to high precision with directional alignment with hidden magnet inside the coaster. It has been trial and tested to ensure the force spot will turn up every time without fail.

It is not a simple weighted die that will fall on the same spot every time you roll it. You can use it as a regular die!

When the die is rolled into a glass (almost any glass can be used) it moves naturally until it stops beautifully on the forced spot. No awkward sudden jerky movements to say out loud "Hey! There is a magnet!" (Although there is)

There are NO ELECTRONICS, NO BATTERIES. Last forever with proper usage.

Can be applied to any routine required to force a number from one to six.

No skill required. All the work has been done for you!

Features:

- 17.5 mm resin magnetic die
- Include one extra normal die
- One gimmicked magnetic cork coaster 5.8mm thick
- Use your own glass (not included)

- Force number is random for each unit
- Detailed video instructions.
