

Keynote by Seth Race

From the creative mind of Seth Race, creator of such effects as W.M.D, Bankript, and Coinnect comes a new object through bill concept that goes to a whole new level!

Keynote is a key through bill which can work with most borrowed keys and visually melt and pierce through a borrowed, signed bill right in front of your spectators' eyes!

- Ready to use out of the box, no DIY arts and crafts
- No magnets
- Bill can be borrowed and signed
- Hand the key and bill out for examination immediately after
- Works with most borrowed keys
- Easy to do
- Works with any bill whether paper or plastic

Keynote

is a visual that you'll want to perform over and over whether it's for close-up performance or on Zoom and social media, it's fun, easy to do and small enough to carry with you everywhere you go!

"Keynote is frigging awesome such a clever idea, I carry mine everywhere I go ready to perform."

- **Jimmy Strange**

"Borrowed and examinable.... genius!"

- **Bennie Chickering**
