

## Butterfly Holo Seconds

Butterfly Playing Cards Holo Edition!

This unique Butterfly deck features a blacked-out design with a black border. The backs and faces use no color. Instead, they are covered with a holographic foil!

To complete the whole aesthetic, the cards have matte black gilding. The gilding helps the backs transit to the faces flawlessly and makes the holographic foil stand out.

So why are these called "Seconds"?

The first print run was not quite up to our standards. The details on the backs and the faces (especially Aces, Jokers, and the double-backer) ended up slightly blurred and mushed together. As we always strive to provide the best product, we reprinted them.

We also did not want to discard 2.000 decks, so we bought them and want to offer them to you at a heavy discount. Although not perfect, these are still gorgeous to play with.

These are a great choice if you want a beautiful holographic deck to play with, practice cardistry, or have fun with.

We made these easily recognizable from the standard edition. The "Seconds" don't have a seal and have an inverted back design on the back of the tuck box.

We printed these with WJPC on a thick 330gsm stock to prevent the foil from pushing through the card to the other side.

Each deck includes a blank face card and a double-backer.

Limited edition of 2.000 decks
