

The Worker's Diary by David Forrest

Mark Elsdon's 'Workers Diary'

is finally available again!

"I opened my Magic Castle show with this effect last year. It's a trick I've done consistently in all performing environments over the years and it never - NEVER - fails to ABSOLUTELY SLAY!"

- Dave Forrest

And, this re-release brings this powerhouse effect bang up to date. Along with the special deck, the new release includes a 'souvenir' style diary that takes up practically no pocket space at all.

But, better than that, you will also get access to a specially compiled Google Diary meaning you don't need to carry an actual diary at all - it's right there on your phone!

The effect is as straightforward as they come:

A spectator is shown a diary that has a playing card written against every day of the year. They are asked to look up their birthday to find out what their 'birthday card' is. They can check to see that, a different date would definitely have resulted in a different card and yet, when you remove their birthday card from the deck it is the only red card in a blue deck AND it has 'Happy Birthday' written on its back!

It's MIND BLOWING. It's SELF WORKING and the big clue is in the title - it's a WORKER'S DREAM!
