

## HEX by Christian Grace

A groundbreaking new effect from Christian Grace, creator of Level One.

**Hex** is the cleanest way to reveal a card someone is just thinking of. They think of a card, and they also freely choose a card, and you reveal both. It looks like real mind-reading.

It seems like this trick is over, but then comes the moment that stops everything. The entire deck they selected from is completely blank. And somehow, even the card they're holding is now blank too. Everything that happened took place completely in their minds!

Hex comes with two custom gimmicks, detailed instructions, oh, and there is no deck switch.

You'll also learn three complete routines, one of which uses a regular deck of your own.

### Why You'll Love It

- Everything happens in the spectator's hands
- The card is genuinely thought of
- No deck switch
- Nothing is written down
- You'll learn three complete routines, including one that uses a normal deck

### Hex

isn't just a trick. It's an experience that makes people question what's real.
