

## Levitas by Jack Nobile and Piero Puddu

Imagine being able to stop time right before your spectators' eyes.

With **LEVITAS**, a simple object - a card, a receipt, a coin, or any small item - begins to levitate between your hands, slowly, as if lifted by an invisible force. Then, suddenly, it freezes in midair, suspended in space, creating a moment of pure magic and impossibility.

Perfect for any situation: street magic, close-up, parlor, and even stage performances.

- Instant setup - ready in just a few seconds.
- Always-ready gimmick - carry it easily in your pocket or wallet.
- No complicated preparation - perform anywhere, anytime.
- 100% customizable - you decide which object to levitate.

There is no other gimmick like it on the market - so invisible, so practical, and so simple to use.

Developed by Piero Puddu and Jack Nobile, **LEVITAS** is not just an effect, but a visual experience that will leave your audience speechless.
