

## Printing on Demand by David Solomon

This is one of David Solomon's favorite packet tricks. It full of visual transformations and multiple climaxes.

Themed around how everything is now being printed on demand... even playing cards. You place a blank Bicycle card to one side.

You then show four Jokers with blank backs. One by one you print four different colorful backs on them. After the four backs are printed, you magically cause all the Joker faces to vanish, leaving you with four blank cards with different backs. As a surprise ending, the blank card you placed aside at the beginning now has all four Jokers.

Comes with all necessary cards and access to a video tutorial by Meir Yedid and David Solomon. A Meir Yedid Magic product.

**NOTE: These cards were custom printed by David Solomon and are not on Bicycle stock**
