

## PITATA Smart Printer Mini - Bühnentricks

PITATA Smart Printer Mini: The Next Evolution in Portable Prediction

Following the success of the original PITATA Smart Printer, the PITATA Smart Printer Mini takes everything magicians loved — and makes it smaller, lighter, and quieter than ever.

Enjoy the trailer here to see what it can do and a comparison with the original printer!

The PITATA Smart Printer Mini is the next generation of PITATA's smart printing technology—redesigned for greater portability and practicality in real-world performance.

Building on the success of the original PITATA Smart Printer, the Mini retains the same powerful software features while introducing a completely new, compact hardware design. Using a 57 mm thermal print module, all components have been efficiently re-engineered into a body smaller and lighter than a standard phone charger, making it easy to carry in any pocket or performance bag.

A newly developed RC battery ensures reliable power and smooth motor operation while significantly reducing printing noise, allowing for quiet and confident use in close-up environments.

The PITATA Smart Printer Mini runs on the PITATA Pro App, supporting nearly all functions from the original PITATA Smart Printer, including:

Finger Drawing

Clock Image

Magic Square

Confabulation Routine

Receipts

In addition, it introduces a new Card Prediction feature and offers seamless compatibility with PITATA's IoT system. This allows full integration with other PITATA devices such as the Impression Pad and PITATA Palm Remote, enabling automated, hands-free performance possibilities.

Predictions can also be printed on the updated THERMAL Notepad. Now you are

able to print in BLUE "ink", designed to give printed outcomes a more natural and realistic look.

The PITATA Smart Printer Mini combines refined hardware, stable performance, and versatile connectivity, making it a compact and reliable tool for professional magicians who want discreet, high-quality prediction printing in any setting.

Dimensions:

Main Unit: 76mm \* 42mm \* 25mm

What's Included:

1x PITATA Smart Printer Main Unit

1x Charging Cable

2x Thermal Paper Rolls
