

The Bound Deck by Juan Luis Rubiales and Bacon Magic

The Bound Deck

breaks every assumption your audience has about card magic. The cards are literally bound together-you can't shuffle, spread, or cut them. From the very start, spectators wonder: *"How can any magic happen with this?!"*

Yet the miracle unfolds with every flip of the pages.

Effect

You show two unique "card books." A spectator calls "stop" as you flip through one of them and freely chooses a card. You display their selection, then flip both books from the beginning. Although the two decks appear completely unrelated, they match at the chosen card.

A snap of the fingers-and flipping again reveals that every single card in both books now matches!
