

FULTON's Arcade Gameboy Edition - Pokerdeck

Did you miss the Switch 2? Do you dream of a certain handheld gaming system that was popular in the late 80s? I got you covered.

These Fultons Playing Cards are the best handheld device since the glory days with colors to bring you back to monochromatic green screens.

Featuring a long flap embossed tuck box and vibrant color matched tones evocative of better days. This is the best Arcade has ever looked.

The back design color evokes those days of playing for hours on a green colored screen in the back of your folks minivan. No detail has been spared. From the period appropriate long tuck box flap-to the embossed grid lines on the box. The feeling of pulling that green deck out of a grey box is priceless. Take me back to the 80s...with this deck I'm halfway there.
