

## Pigmento by Jordan Victoria

### Pigmento

is a new approach to modern mentalism: a system designed to offer a free, direct and ultra-accessible experience *without sacrificing impact*.

This is not "just another prediction effect." It is a way to transform *any named word and any named color...* into a revelation that is already waiting in your pocket or wallet, *written on your own business card*.

It doesn't matter if the person names a first name, an object, an animal, a place...

It doesn't matter what color they name...

Pigmento always delivers a perfectly coherent final moment, impossible to backtrack, and deeply personal for the participant.

**An experience designed for all magicians/mentalists.**
