

## Cheep Trick by Nojima & Bacon Magic

After years of dedicated research, Nojima Nobuyuki presents his long-guarded secret weapon: **CHEEP TRICK** - a brilliantly versatile gimmick that expands what's possible in card magic.

With **CHEEP TRICK**, you can effortlessly make cards appear, vanish, transform, or instantly locate spectators' selections in a shuffled deck. Whether it's producing a Joker without looking at the faces, performing a clean sandwich routine, or executing a sleight-free vanish, this ingenious tool opens up endless possibilities.

Despite its power, **CHEEP TRICK** stays completely invisible during performance. You can carry it in your wallet at all times and integrate it into your regular deck whenever you wish - it never interferes with your normal card routines, and it works perfectly with any brand or design of playing cards, not just Bicycle.

Nojima himself has carried this gimmick for nearly a decade - a testament to its practicality and value.
