

Cube Mix by Rizki Nanda

Introducing **Cube Mix by Rizki Nanda** - The Rubik's Revolution!

The moment Rizki Nanda showed us **Cube Mix**, we fell head over heels for it and you will too! Imagine the iconic Rubik's Cube combined with a mind-blowing prediction effect... but here's the twist: you don't need to know how to solve a cube in fact, you don't even need to own one!

Years ago, Mark Elsdon's Rubik's Predicted became one of our best-sellers. Now, Rizki has taken that beloved concept, flipped it upside down, and turbo-charged it into something truly next level.

Here's how it looks:

A stack of beautifully printed cards is introduced, each card shows a different face of a scrambled cube, complete with special transparent windows. Why the windows? Because when you overlap two cards, they create an entirely new and totally random mix!

You deal through the cards one by one, inviting your spectator to shout "STOP!" whenever they like. They do and you reveal the exact mix they've created. One card earlier or later, and the result would be completely different but their choice is 100% free. Yet, despite all this freedom, you reveal you've predicted their unique mix perfectly in advance!

And if that's not enough to get your inner cube lover excited, we gave a set to Craig Petty and, true to form, Craig has unleashed a ton of powerful, practical routines that squeeze every drop of magic from these gorgeous custom cards.

Cube Mix is clean, clever, and absolutely impossible in the eyes of your audience. It's the kind of effect you'll love performing: simple, direct, and utterly mind-blowing every single time.

- No cube-solving skills needed.
- No actual cube required.
- Just pure, astonishing magic and mentalism.

Get ready to mix things up **Cube Mix** is your new favorite prediction miracle!
