

Equix by Pilato

A visual impossibility, clean and fully verifiable.

EQUIX is a close-up magic effect where everything can be shown and examined by the audience.

A completely empty crossbar is presented. In plain sight, two candy bars pass through it, creating an impossible image.

The audience closely observes that there isn't enough space for the bars to cross.

Then, they are removed one by one and presented again for examination.

To conclude the effect, the candy bars are broken and eaten, confirming that everything is real.

FEATURES

- Direct and visual effect
- Fully verifiable props
- Ideal for close-up magic
- Ending with real, edible objects
- Allows for the use of different flavors and colors available in each country

INCLUDES

- Gimmick
- Instructional video

EQUIX

is a clean, simple, and surprising magic trick, perfect for creating a real impossibility right before the audience's eyes.
