

## Stage Card Effect System by Menzi Magic & Zhao Xinyi

Flash, flame, and smoke are three classic stage effects commonly used by almost every magician in their performances. Today, we have combined these three devices into one, proudly presenting the **Stage Card Effect System (SCES)**.

From now on, you no longer need to hide them in your sleeves, connect a mess of tangled wires, or worry about your assistant pressing the remote at the wrong moment. Simply attach it to the back of the card and press the switch at the exact moment you need it.

Its dimensions match those of a standard playing card. Four switches are distributed around the device (each can be independently disabled to effectively prevent accidental activation), making them easily accessible in almost any palming position.

### Some Applications

- Card Fan Production with Flash
- Card Vanish with Smoke
- Cards Flash to Ball
- Smoke Transfers into Glass
- Ball Transform to Card Fan with Smoke
- Card Fan Flash Transposition, etc.
