

Fright Night by David Forrest

Dave Forrest's '**Fright Night**' is a self-working, horror movie themed mentalism effect that will absolutely FLOOR your audience.

The effect couldn't be any simpler: You display six small (A7) cards, each depicting a classic horror movie. Referencing a recent online article about the influence of horror movies, you ask your spectator to decide on ANY one of the six movies.

No matter which one they choose you can VERY CLEANLY prove that you predicted that exact movie!

This is 'multiple-out' effect which will produce a different outcome each time. EVERY outcome looks like an undeniable, dead-on hit with no funny business whatsoever and no suspicion that any other outcome was possible.

And, as a performer, you'll be delighted when one particular movie is chosen because the 'proof' that you predicted that movie is absolutely MIND-BLOWING!

This effect typifies Dave's commercial mentalism work:

- Easy to do.
- Works every time.
- Straight-forward and SUPER-CLEAN.
- Fits in a shirt pocket.
- Interesting props.
- Clever construction and method.

'**Fright Night**' is a no-brainer for performers of all levels and is suitable for any close-up situation from paid gigs to a casual performance for your friends at the bar.
