

## **Mouth Coil Pro by Gonzalo Albiñana and CrazyJokers**

### **Mouth Coil Pro**

**is the perfected version of the classic Mouth Coil, created by Gonzalo Albinana for performers seeking an impossible, clean, fully controllable and genuinely practical production in any situation.**

**After years of personal use and working as a consultant for other artists and shows, Gonzalo has developed a simple yet highly functional accessory that transforms the classic Mouth Coil production into something truly magical and full of possibilities. It begins and ends with the mouth empty and the hands empty - even during the production - with no extra effort required. The reusable material, stronger and lighter, maintains a large final volume without adding weight in the mouth or causing discomfort.**

**The result is a visual, expansive and elegant production, suitable for close-up, children's magic, visual magic and theatre performances alike - leaving behind all the problems of the past. No discomfort. No saliva ruining everything.**

**Designed for professionals, yet accessible to any magician who wants to incorporate a solid and reliable effect into their show.**

#### **Includes:**

- **Two ready-to-use accessories (although only one is required)**
- **Extra material**
- **A full Albinana-style tutorial, packed with ideas, handlings, practical advice and presentations based on real stage experience - including 16 ideas and routines, plus a bonus gift idea: the Invisible Coil. Be inspired and create your own.**
