Coco Trick — When nature meets magic, the impossible becomes adorable!

The most adorable prediction trick in the magic world

Coco Trick transforms a simple ladybug into a prediction miracle! This original and charming routine blends the beauty of nature with magical impossibility to create a moment of pure wonder.

### The Effect

You show a card depicting a blank ladybug to your spectator. After taking out a sealed prediction, you invite them to “create” their own ladybug by freely placing black dots on the insect’s body, then drawing the head however they wish.

Once the personalized ladybug is complete, you reveal your prediction... and it matches the spectator’s unique creation perfectly! Same distribution of dots, same head position, same orientation — a flawless match that defies all logic.
