

# Magic Drawer by Bacon Magic

## Magic Drawer

is the latest drawer utility jointly developed by Magic Class and Bacon Magic.

Designed to resemble an everyday pencil case, its appearance feels completely natural and justified, allowing it to sit in any environment without raising suspicion.

The interior offers generous space, easily accommodating common magic props such as pens, sponge hearts, silks and other small accessories, making it highly practical for real-world use. The bold purple and yellow color scheme is eye-catching while maintaining a strong sense of magical aesthetics. Manufactured using high-quality injection molding by Magic Class, **Magic Drawer** features solid construction, refined details, and an overall premium feel.

In terms of operation, **Magic Drawer** abandons the traditional bottom-push mechanism found in many drawer devices and instead utilizes a gravity-based operation. This allows for smoother handling and leaves virtually no visible clues on the exterior, significantly enhancing deception and reliability during performance.

Whether for practice at home, travel, or professional performances, **Magic Drawer** is a dependable utility that balances practicality, concealment, and deceptive design.
