

## Project H: Lit Match by J.S.M. Studio & Bacon Magic

As manipulation magic becomes increasingly rare, Korean magic continues to lead the global stage with precision and originality.

Renowned magician **Sung Min Jeon** created the **Alphabet Project**, a 26-theme series focused on refining the structure and practicality of stage magic. Following the success of *Blando Silk*, he now presents **Project H: HOLDER** - a professional holding system designed specifically for stage performance.

**Why Project H** Stage magic requires fast, silent, and reliable loading of props. Traditional solutions often fail:

- Table or box storage can be disturbed by assistants.
- Body-loaded props may shift or fall during performance.

### Project H

solves these problems with stable, purpose-built holders developed through real stage use.

#### H2 Lit Match - Matchstick Holder

- **Magazine-style design:** Load once, use multiple times with a simple sliding action.
- **High compatibility:** Two cap sizes for different match types; side slot for flash paper.
- **Flexible mounting:** Attaches discreetly to clothing, boxes, or stage furniture.

#### Package Contents

- H2 Lit Match Holder 1
- Match Caps (2 sizes) 2
- Match Striking Surface Refills 2

*Matches and flash paper not included.***Project H**

is not just a holder-it's a practical upgrade to the stage magician's workflow,

improving reliability, timing, and performance flow.
