

Jeu de Hasard by Frédéric Perrin

Imagine: several objects are lined up on the table in front of the spectator. The spectator is invited to roll the dice several times. Each roll eliminates several objects until only one remains... the one that was predicted.

In **Jeu de hasard**, Frederic Perrin not only reveals a diabolical method, he also provides a wealth of ideas, variations, and staging options so that you can adapt **Jeu de hasard** to your own repertoire.

"It's a simple but effective idea. Congratulations on coming up with it!"
- **Gabriel Werlen**
