

larvel Magic Post-It by larvel Magic

The larvel Post-It Pad is the latest breakthrough in our impression pad lineup, designed to elevate portable mentalism to new heights. Like its predecessors, this tiny impression pad secretly transmits your spectator's written thoughts to your peek devices—such as the larvel App, Apple Watch, or third-party tools like the PeekSmith. Its key strengths lie in its compact size, perfect disguise as an ordinary Post-it pad, and remarkable battery life for such a small device. Small enough to slip into your pocket yet powerful enough to stun a crowd, the larvel Post-It Pad blends seamless technology with ultimate stealth, making it an essential tool for magicians on the move.

BASIC EFFECT^{1/4}:

You stroll into a lively bar, the clink of glasses and hum of conversation buzzing around you. With a casual air, you slip off your watch, set it face-down on the table, and mutter, "I need a break from time." Then, you pull a small, ordinary-looking Post-it pad from your pocket—nothing special, just something you'd find at any stationery shop—and hand it to a curious stranger. "Write down the name of someone you've been thinking about lately, and a time that holds meaning for them," you instruct, before stepping away, weaving through the crowd a good distance off, chatting with others as you go.

They jot down their thoughts, tear off the sheet, and slip it into their wallet. You return to their table, a sly grin on your face, and with a touch of theatrics—as if reading their very expression—you declare, "Is it... Sarah?" Their jaw drops as they pull the paper from their wallet to confirm. Before they can recover, you add, "That might've been a lucky guess, but I'm not great at guessing time. I'm better at something far more intriguing—implanting thoughts into people's minds. You see, I set my watch to a specific time before placing it face-down. If I can truly influence your thoughts, flip it over and see if it matches the exact time you wrote."

They turn the watch over—the hands point precisely to their written time. They reveal the paper, and the match is undeniable. A miracle unfolds, all thanks to a humble Post-it pad that hides its magic in plain sight.

KEY FEATURES:

Pocket-Sized Portability: Its compact Post-it size makes it a breeze to carry anywhere—slips into your pocket, bag, or even a wallet with ease and this makes it The Perfect EDC.

Perfect Disguise: Looks, feels, weighs, and behaves like a regular Post-it pad from any stationery shop—zero suspicion, pure stealth.

Hidden Gimmick: The impression board is cleverly concealed within the last few sheets at the back, undetectable even when spectators hold or write on it.

Versatile Placement: Remove the gimmick and hide it under a cloth, bag, or any surface where paper meets pen—the impressions still transmit perfectly.

Rugged Durability: The outer paper needs gentle care like any Post-it, but the internal high-quality plastic board withstands falls, crashes, and rough gigs—ideal for bars, weddings, or street performances.

Instant Impressions & Multi-Spectator Handling: Impressions are revealed almost instantly with near-zero delay between the spectator's writing and your peek device receiving them. The larvel App takes it further, handling up to 9 different spectators' inputs at once—even if they all write in the exact same spot. The app intelligently processes and stores each entry separately, allowing you to recall all 9 impressions anytime, ensuring you never miss a detail.

Extreme Range: Get real-time impressions from up to 60 meters away, letting you sell the trick even harder by keeping your distance.

Multi-Device Peeking: Connects to multiple peek devices at once—keep one for yourself and hand another to a stooge for double the impact.

Broad Compatibility: Seamlessly links to the larvel App, Apple Watch, PeekSmith, and soon-to-be-announced magic devices like printers.

larvel Input Ready: Works with larvel pens, the new larvel Marker, and will be compatible with all our future input devices for maximum flexibility.

Easy Refills: When the paper runs out, just grab a standard Post-it pad, peel off a stack, and stick it on—ready to go in seconds.

Smart Time Detection & Control: Controls time on up to 15 larvel Watch series devices at once and is compatible with the entire lineup, from the classic larvel Watch to the latest models.

Long-Lasting Power: A swift one-hour charge powers up to 8-10 hours of uninterrupted performance—ideal for all-night gigs and extended shows, ensuring your magic never fades, even during the longest sessions.

WHAT YOU RECEIVE:

1x larvel Post-It Pad

1x larvel Pen

2x Refill Inks
