

Dimension L 2.0 by Sun & MJ

The worldwide best-seller Dimension L 1.0 has been discontinued, and it has been completely reborn as version 2.0 in collaboration with Sun Production.

Dimension L allows you to float light in the air and control it freely like magic. You can also produce wands, silks, and more from the floating light. Since it does not use unstable tricks like thread, you can control the light very stably and delicately. It improves the chronic drawbacks of levitation magic, making it performable in everyday conditions. You can learn all of MJ's original routines shown in the trailer video.

Q & A

Q. What is the difference between Dimension L 1.0 and 2.0?

A-1. The product design has been perfected, and overall quality and durability have been greatly improved.

A-2. Issues such as switch contact failure and LED flickering have been resolved, and the risk of injury due to poor armband finishing has been completely improved.

A-3. A pivot production routine, where light appears after showing empty hands, has also been added.

Q. Is the smoke function included?

A. Smoke function and device are not included in the package. The smoke in the trailer used Sun Smoke Pro, and you need to purchase it separately for that effect.

Q. Is warranty service available?

A. Sun Production guarantees perfect warranty support for any issues with version 2.0. (Requires verification of the genuine serial number. Please be careful not to lose it.) (Charges may apply depending on the condition of the product.)

What's in the Box Dimension L 2.0

- Magnet wand (white)
- Arm band silk gimmick holder x 2
- 18-inch diamond silk (White) AAA batteries x 2

- Lecture QR code
- Genuine serial number
