

Card-It Flash (Red) by Anthony Vasquez

Card-It Flash

is a highly visual magic effect where a simple Post-it note visually transforms into a real playing card in a single, eye-catching moment.

The effect is clean, fast, and designed to create an instant reaction. The audience clearly sees the Post-it before the transformation, making the change feel impossible and magical.

This effect is perfect for:

- Close-up magic
- Social media videos
- Casual performances

Card-It Flash

is easy to perform, requires no difficult sleight of hand, and can be learned quickly. It resets fast and is practical for real-world use.

The visual nature of the transformation makes it ideal for both live performances and Social media , delivering strong impact with minimal setup.
