

Master Con by Greg Wilson

Most businesses take credit cards and so can you - literally.

Welcome to the perfect crime where two credit cards secretly switch places between your hand, your pocket, and your wallet!

Next, one card from your wallet disappears and reappears to anywhere within arms reach: your back pocket, your sock, even an unsuspecting victim's purse or pocket!

In the final phase, with very little cover, you swiftly steal one of the credit cards from the spectator's *front* pocket, leaving everyone convinced you have the hands of a surgeon - a plastic surgeon.

Most importantly, there is ZERO sleight-of-hand required, as the special wallet and custom-designed cards do all the heavy *lifting*.

PICKPOCKET IMPERSONATOR

If you ever wanted to do pickpocketing, now's your chance, without the years of practice and getting beat up after you get caught. With Greg's master criminal method, swiping a card from a pocket is as easy as swiping a card at a terminal.
