

Social Monte Project by Adrian Vega and CrazyJokers

Welcome to "**Social Monte Project**" by Adrian Vega, a modern evolution of a classic, featuring unique and commercial printed Social Media logos.

From the creative mind of Adrian Vega (as seen on Fool Us, FISM, and the prestigious FFFF Convention) comes Social Monte Project - a deep and practical study inspired by the legendary effect created by Pepe Carroll, now reimaged for today's digital world.

For the first time, this powerful classic can be performed using specially printed cards featuring social media logos, creating instant recognition and engagement with modern audiences. The result is direct, relatable, and highly commercial magic.

What's Included in Social Monte Project?

- Two specially card sets (one of them with exclusive custom social media designs)
- A comprehensive study of the effect, including multiple handlings, subtleties, and performance approaches.
- Presentation ideas tailored for close-up magic, corporate events, and social media environments.
- A strong promotional magic piece, perfect for magicians who want to stand out with a contemporary concept.

This is more than a trick.

It's a professional marketing effect.

It's a natural evolution of a classic effect.

Social Monte Project transforms a timeless routine into a modern, visual, and memorable experience.

Update your magic. Connect with your audience. Make the classic amaze again.
