

## Spark 2.0 the Self Lighting Candle by Ochiu Magic

Spark is the world's first remote-controlled self-lighting candle designed exclusively for close-up magic. This candle looks and feels exactly like a real candle-to the point where you can actually place it on your spectator's hands. Yet, with just the quick push of a button, you can make a flame magically burst out of the top of the real candlewick.

*"I love 'Spark'. It's reliable, easy to use, and magical!"*

- **Cyril Takayama**

*"This is something that I've wanted to do forever but could never find the right way to do it. It's perfect!"*

- **Dan White**

Unlike other self-lighting candles reserved for stage magic, Spark 2.0 is the perfect companion for close-up magicians. You can place the candle directly on your spectator's hands without them ever suspecting it is gimmicked, thanks to the new Premium crack-resistant wax that ensures a flawless look and feel.

**RELIABILITY & PERFORMANCE UPGRADES:** A fuel tank cleverly concealed within the candle houses enough lighter fluid for repeat ignitions. Spark 2.0 now features a Transparent Fuel Chamber for precise refueling and an Enhanced Ignition system for maximum reliability. With the included Flame Cover, fuel life is significantly extended to 2-3 hours, allowing for a long burning time of more than 10 minutes whenever you need it.

**SMART POWER MANAGEMENT:** Spark 2.0 is equipped with a modern TYPE-C quick charge system. The updated battery system now includes a Protected circuit with power management, offering a stable 60-minute usage window after setup. For your peace of mind, we've also added a 60-minute safety auto-shutoff to prevent accidental battery drain.

**PRECISION ENGINEERING:** We've replaced the old magnetic base with a new Magnetic + Twist-lock system, allowing for tool-free access to the inner compartments. Every Spark 2.0 now comes with a 1-year warranty coverage.

**BONUS:** As Spark is naturally a perfect complement for any Gypsy Thread routine, you will also receive a spool of thread.

## **SPARK 2.0 QUICK STATS:**

- Premium Material: Crack-resistant wax for a realistic feel.
- Easy Maintenance: TYPE-C charging and tool-free twist-lock base.
- Advanced Safety: 60-min auto-shutoff and protected circuit.
- Precision Refueling: Transparent fuel chamber + extended fuel life (2-3 hours with cover).
- Control Radius: Reliable five-meter remote control.
- Travel Ready: Can be packed in carry-on luggage (US/China).
- Guaranteed: Includes 1-year warranty.
