

Forcing Cup - Bühnentrick

Forcing Cup is a professional dice forcing system designed to deliver natural handling, reliable results, and maximum practicality in live performance.

Developed as an evolution of our earlier forcing dice system, Forcing Cup removes the need for a separate coaster or additional props. By integrating everything into a single, ordinary-looking cup, the entire routine becomes more portable, more natural, and easier to justify in real performance situations.

A Natural Object, Fully Inspectable

The cup is made from one-piece ceramic construction, designed to look and feel exactly like a normal cup.

There are no visible marks, seams, or suspicious features, and the cup can be casually shown or handed to the audience without concern.

Because the object itself feels familiar, spectators naturally accept it without overthinking—making the method even more deceptive.

Smooth, Natural Forcing Action

Unlike many forcing cups on the market that rely on overly strong magnets, Forcing Cup is carefully balanced to create a natural action.

When the dice are dropped into the cup, the force happens invisibly. Afterwards, the dice can be poured out smoothly without sticking unnaturally to the bottom—no tapping, shaking, or awkward handling required.

This keeps the entire sequence looking fair and effortless.

Multiple Dice, More Possibilities

Forcing multiple dice opens the door to a wide range of routines, including:

- Two digit number selections.
- Card positions.
- Prediction effects.
- Multi-phase routines.

The system supports all six dice outcomes (1–6), fully covering every possible result.

Precision Dice System Included

Each set includes a complete dice system:

- Six gimmicked dice (one for each outcome, 1–6).
- Three regular dice for examination and flexibility.

The included dice are perfectly matched to the cup's magnetic strength for consistent, repeatable results.

Built for Real Performance

Forcing Cup was refined through extensive live performance testing, repeated handling, and careful adjustment of magnetic strength and materials.

The result is a system that is:

- Easy to use.
- Reliable over repeated performances.
- Natural in appearance and action.
- Practical for close-up, parlor, and walk-around magic.

What's Included

- Forcing Cup.
- 6 gimmicked dice (1–6).
- 3 regular dice.
- Online instructional video.
