

Close Up Matte - Black Art Close-up Pad Set (Small) by Bond Lee & Stephen Chan

Introducing **Darkness: Black Art Close-up Pad**, produced by Bond Lee, Stephen Chen & MS Magic

Darkness is our newly crafted black art close-up pad, blending premium functionality with professional magic potential. It serves not only as a high-quality close-up mat-ensuring smooth card shuffling and laydown for casual or competitive play-but also stands as our exclusive, magic-focused creation tailored for performers.

The mat's defining strength lies in its ability to elevate your acts to hyper-visual magic moments. Unlike ordinary mats, it creates the perfect visual contrast and surface condition to make props "appear out of thin air": whether you're conjuring a deck of playing cards, a stack of coins, or even banknotes, the transitions are crisp, seamless, and stunningly convincing to audiences, unlocking boundless creative possibilities for your routines.

At its core is our custom-developed material for close-up black magic. This specialized fabric isn't just durable and non-slip-it's engineered to complement magic techniques (such as hidden prop storage or quick transfers) while remaining unnoticeable to spectators. It even lets you customize your own magic tools, turning the mat into a versatile base for personalized tricks that set your performance apart.

When magic mode is off, it functions flawlessly as a regular card mat, fitting all standard card sizes for daily games or practice. We offer two sizes to suit different scenarios-whether you need a compact mat for on-the-go street magic or a larger one for stage or tabletop performances.

Two sizes available:

- Small 40cm x 30cm
- Large 50cm x 35cm

Each set comes with a **Darkness black art close-up pad** & a 30cm x 30cm black art material, so you can customize your black art props.
