

Exit Playing Cards by TCC Fashion

Inspired by the “Little Green Man,” we’ve transformed the visual language of the emergency exit sign into a brand-new symbol in the world of cardistry.

Its simple, direct, and urgent running figure gives the deck exceptional visual recognition and a strong sense of instant impact.

More Than Just Green

The foil on the tuck case shifts through different shades of green under varying light and angles, yet it always stands out as the brightest point in the dark.

The green on the cards themselves is even more striking — a vivid neon hue that bursts into brilliance under UV light.

Bold indices ensure quick identification in casual games, while the “Little Green Man” in the suit pips creates a seamless animation when the cards are fanned or riffled, adding a dynamic touch of surprise to your performance.
