

Weights Game by TCC Magic

This classic set is a sophisticated variation of Dai Vernon's original Chink-a-Chink weights. We have elevated the craftsmanship and added an extra silver version. This addition expands the possibilities, allowing this nearly century-old classic to find new vitality in the contemporary magic scene.

Each set of weights enables you to perform numerous classic magic effects.

- **Three-Dimensional Matrix:** The weights' unique characteristics allow for a highly visual "Matrix." Watch as the weights, covered by playing cards, mysteriously shift positions on the tabletop. Their noticeable height difference makes this miracle even more astounding to the audience.
- **Classic Hopping Half Routine:** Use the two different colored weights to perform the classic "Hopping Half" routine, creating a vivid magical skit right in your palm.

Beyond the routines in the tutorial, you are encouraged to explore and unlock endless creative ways to perform.

Design and Craftsmanship

Quality is evident in the details; superior craftsmanship is found in every nuance.

- **Materials:** The gold weights are made from smooth brass, while the silver versions are crafted from solid stainless steel, providing a satisfyingly substantial feel that inspires confidence.
- **Finishing:** The weight markings are clear and exquisite, and the hand-polished edges are smooth, comfortable, and offer an excellent tactile experience.
- **Precision:** Each gimmick shell has been precisely calibrated to ensure a minimal size difference between the shell and the weight, allowing the shell to encase the weight perfectly and seamlessly.

What's Included

- One set of Gold Weights
- One set of Silver Weights
- Detailed Tutorial

(Each weight set contains four weights and one matching weight shell.)
