

## Flying Silk by Quique Marduk

Introducing **Flying Silk (regular model)** by Quique Marduk

This is the classic device to make a silk fly on stage.

The silk can go in straight line or rotating around a stick, microphone, etc, giving the impression that it comes and goes.

It can be used in your hand (hidden) or by an assistant from out of stage.

The mechanism is smooth and very silent, the spool has an extremely thin but highly resistant monofilament with a length of 30 feet.

Works with a regular 9 volt battery

Silk and battery does not included
