

## Aluminum Alloy Cups and Balls Matching Solid Cup by TCC Magic

### Introducing **Matching Solid Cup for the TCC Aluminum Alloy Cups**

This solid cup looks and feels like the **TCC Aluminum Alloy Cups**, with the bottom filled. You can use it as a surprise ending to your Cups and Balls routine or one-cup routine.

The key difference between this solid cup and the normal solid cup lies in its bottom design: it stands 8mm higher than the cup mouth. This design prevents the cup from falling due to unstable placement when stacking the cups at the end of the traditional solid cup performance routine, ensuring a neat and tidy performance and leaving a perfect finishing touch for your show.

**Note:** The **Solid Cup** is not part of the Aluminum Alloy Cups and Balls Set and needs to be purchased separately.
