

Celestial Bell by Zhou Yu & Tom Wei

Introducing **Celestial Bell**

- Designed by Zhou Yu
- Crafted by Tom Wei
- Presented by TCC Magic

Praised by top magicians across China, including Lu Chen and Eric Chien.

Experience magic you'll truly enjoy, even the secret is a delight.

No electronics, just exquisite mechanical craftsmanship inside.

"Wow... wow... I've actually seen Zhou Yu perform with this before. It's incredibly powerful and magical. I truly believe every magician should own one. If you've witnessed its effect, you'll know exactly what I mean - it feels like a dream. You'll question if you're truly living in reality. This bell blurs the line between reality and illusion. Absolutely amazing!"

- **Lu Chen**

"I highly recommend the Celestial Bell to everyone because it's actually the biggest contributor to my show. I wouldn't be able to complete the entire performance without it.""

- **Eric Chien**

"The Celestial Bell, created by Zhou Yu, is the most incredible bell magic I've seen recently. You definitely don't want to miss it!"

- **Bond Lee**

If what you see can deceive you... What about what you hear?

In most magic performances, the impact is primarily visual. Wonder stems from what the audience sees. But what if you could add another powerful layer-sound?

The sound of a bell is among the most resonant. When paired with movement and rhythm, it evokes something deep and primal. Bells naturally align with the spirit of magic, and many magicians use them to elevate their acts.

Introducing the debut release from Chinese magician Zhou Yu - the Celestial Bell: a bell whose clapper and sound vanish, without anything to ditch.

Imagine this: Throughout your routine, a bell rings clearly, always in full view, never hidden. Then, in the final moments, the audience realizes the bell never had a clapper at all. There was never any sound... and no sleight-of-hand ditching involved. Even one second before the sound vanishes, the bell rings, and the clapper is seen. The next moment, both the sound and clapper are gone.

This is the brilliance of **Celestial Bell**.

Featuring a precision-engineered, fully mechanical internal structure, it enables multiple styles-from a subtle fade of sound to a one-handed instant disappearance.

No electronics, no sound gimmicks, clean and seamless. It can be performed solo, with no assistants, and resets instantly.

The entire performance flows effortlessly, with secrets so well hidden that even when placed right before the audience's eyes, they remain completely undetectable.

Designed by Zhou Yu. Crafted by Tom Wei.

Each bell is made of high-density brass and African blackwood, hand-polished and individually tested. Every set includes a custom carry pouch and accessory kit, making it easy to transport and ensuring long-lasting performance.

Features:

- Easy to learn and operate
- No electronics, no ditching required
- One-handed operation, instant reset
- Fully mechanical and self-contained
