

Wandering Lipstick Set - Viking

A modern take on the 3 Card Monte effect with a set of unique rattle bars. A Brema/Viking original.

Wandering Lipsticks (Stan Payne). The wandering Lipsticks are an updated version of a Brema effect. Basically, the performer plays a game of 3-card Monte using three brass tubes, one of which contains a brass weight. No matter how hard the spectator tries he can not win at this game.

Even when only one tube is used, the tube is shown to contain the rattle, yet when the spectator picks it up and shakes it, the rattle is gone and is found in one of the other tubes!

Precision machining, beautiful props and complete detailed instructions. 3 brass 'lipstick' tubes, weight and custom carrying case.

Also known as Tel A Tubes.
