

Monster Paddle by Luis Zavaleta & Nox

Introducing **MONSTER PADDLE**

One eye... one transformation... and an impossible moment.

Imagine showing a small paddle with the face of a strange one-eyed monster.

You slowly turn it so everyone can see both sides. Everything looks completely normal.

But then something impossible happens...

The monster's eye disappears from the image.

Immediately, it appears as a real eye in your hand.

The spectators clearly see that the eye has come out of the illustration.

But the magic doesn't end there...

You place the eye in your hand...

and the eye visually squashes, transforming into a flattened, distorted eye right in front of everyone.

A strange, funny, and totally unexpected moment.

Then you take that squashed eye... bring it close to the paddle...

and with a simple touch it returns to its place on the monster's face.

When you show the paddle again...

everything is exactly as it was at the beginning.

As if nothing had ever happened.
