

## Forcing Cup (Large) by Magic Express

### Forcing Cup

is a natural extension of the highly successful Forcing Dice system by Magic's Express, created to simplify real-world performance conditions.

Instead of using a separate coaster, the forcing mechanism is built directly into a clean, everyday-looking ceramic cup. The result is a self-contained system that looks completely natural while delivering reliable and consistent forcing performance.

**Forcing Cup** is designed to work alongside Forcing Dice, not replace it - offering performers an alternative setup for different environments and performing styles.

### System Compatibility

- The gimmicked dice included with Forcing Cup are fully compatible with the existing Forcing Dice set.
- Although the physical size is different, the magnetic strength has been carefully matched, allowing dice to be used interchangeably between both systems with consistent and dependable performance.
- This makes Forcing Cup a strong expansion and add-on option for customers who already own Forcing Dice.

### Key Features

- Custom ceramic gimmick cup with a natural, everyday appearance
- Built-in forcing system - no extra coaster required
- Clean, self-contained setup for real-world performance
- High stability and professional reliability
