

Mini Card Rise Miracle by Martin Schwartz

Have you ever wished you could perform the rising card effect while the deck is in the spectator's hands? Now you can.

Using a mini deck of cards (2 x 1.5 inches), three freely selected cards rise from the deck while it is held in the spectator's hand-featuring three different rises.

One occurs while the spectator holds the cards inside the box. Another happens while the deck rests horizontally in the spectator's hand, with a card rising at their command. Finally, the cards cut themselves like a haunted deck, revealing the selected card.

Dr. Schwartz's ingenious design uses a miniature (non-electric) motor concealed within the mini deck. Simply changing the position of the deck allows you to turn the motor on and off, giving you complete control over the card movements.

You'll get a great audience reaction when you remove the mini deck from your pocket.

Comes complete with the mini deck, video, and printed illustrated instructions.

Also available in bridge size.
