

## Spectra by Luke Dancy

After nearly 15 years, Luke Dancy returns with **SPECTRA**, a bold modern evolution of the classic Chicago Opener (also known as Red Hot Mama).

Your spectator begins by naming any color not just red or blue, but any color they can imagine. Then they freely select a card from the deck. With no suspicious moves, the back of the card they just chose is revealed to have changed into the exact color they named. It's set aside as an impossible moment of personalized magic. But it doesn't end there.

A second card is now selected. When the magician turns over the odd-backed card that's been in plain view, it's no longer the original selection; it has now changed into the second card they just chose.

No gimmicked decks.

No difficult sleight-of-hand or palming.

Just pure, direct magic that feels as fair as it looks.

Start clean. End clean.

Customizable, practical, and visually stunning.

What's included:

- Handcrafted **SPECTRA** gimmicks for both red and blue Bicycle decks
- The SHIFT utility device (a \$20 value included FREE) to expand your routine and handling options
- Professional instruction and performance tips from Luke Dancy
