

Ace Fulton's Casino Bootleg - Pokerdeck

The long awaited third installment of the Fulton's Bootleg Series. These Ace Fultons Casino have been bootlegged--thats right. These are a knock off of the original Fulton's Classic Deck

Many years ago I received an email asking if a deck of my cards were authentic. Turns out they were bootlegged copies found at a night market in Asia. It made me think what the act of copying a deck would look like--so I bootlegged my own using an old Xerox Machine.

These Ace Fultons have never looked so good--a complete replica of the original classic made as a facsimile. Even better--these were "bootlegged" from one of the original versions that never made it to the press.

Tuck box is a photocopy printed on matte paper and is striking.

Only 400 of these decks exist and are the best rendition of this deck official or otherwise.

Printed in China on Cardistry stock.
