

HALLPASS by Julio Montoro - Trick

Hallpass

is an ingenious device by Julio Montoro and James Anthony that lets you produce signed cards and predictions from within an ID holder in a clean and unsuspecting fashion.

Imagine at the end of your favorite signed card routine you point to a playing card that has been in full view from the very start encased inside your plastic **Hallpass** holder.

You slowly remove this card to reveal it's THEIR SIGNED CARD!

Hallpass also works with predictions, billets and much more, plus comes with modifications for USA, UK and EU currency.

BONUS 1: We've included everything you'll need to make up multiple gimmicks which can be switched in real time.

BONUS 2: The blackout module - a twist on the original routine allowing you to perform some mind blowing visuals and additional handlings.
