

Neo Eclipse Ring (23mm) by Leo Smetsers

The new **Neo Eclipse Magnetic Ring** now features a larger surface area. The magnet is no longer visible: the specially custom-made crescent-shaped magnet is fully embedded inside the ring. The ring is made of stainless steel and hand-polished.

The **Neo Eclipse Ring** is not as fragile as many other rings on the market and will not break, crack, or shatter. The best feature of the Neo Ring is that you can fully turn the magnetic force on and off yourself. This allows you to perform exercises with confidence, knowing you won't unexpectedly stick to anything.

Please note: The Neo Eclipse Ring is available in 4 sizes. However, the 19 mm and 24 mm sizes are still in stock in the old model. Please make sure to select the correct size.

How do you measure your ring size?

Ring sizes may vary slightly by country and region, but we can provide an approximate conversion for EU and US ring sizes based on common standards
